I am Sachin Goel, student of FIITJEE Punjabi bagh centre. I came to know about FIITJEE from my friends who had already joined FIITJEE. I joined FIITJEE in May, 2010; having been inspired by Nibin Jain. I got a scholarship of 65% in the admission test and this strengthened my will of joining FIITJEE. Class environment at FIITJEE was ideal for JEE preparation. Faculty at FIITJEE was excellent and best at explaining all the concepts thoroughly. Teachers always inspired me to tackle JEE. A great number of competitive students were there to compare with. Quizzes, CPPs and phase tests were equivalent to JEE level. They provided a lot of practice and mastery over all types of problems. Phase test results and analysis and rank potential index always made me to know where I stand among my competitors. FIITJEE helped me in gaining confidence over my preparation. AITS, RTPPs, CRTs; all were excellent to judge my real preparation level. At the ultimate time, when there is a burden of both board exams and JEE, the best material for revision was provided by GMPs and review booklets. FIITJEE study material is best, complete in all respects, providing all kinds of problems. Every question is useful and involves important concepts. However, it is equally important to go through the books prescribed by teachers because they can provide more practice questions, which is very important to face JEE. Joining FIITJEE is sufficient and there is no need to join any course of any other institute. It is also important at what time you join FIITJEE. The right time to do so is just after class 10th and I suffered for not having done so. Going school is also necessary to maintain your physical and mental health by playing sports and to build your personality and shape your character. I would like to thank FIITJEE for inspiring and helping me to get such a rank in JEE.
